**THE FIRST SCHEDULE**  
**Construction Management Plan**  
**Air Quality and Carbon Reduction**

Requirements to control and minimise NO<sub>x</sub>, PM<sub>10</sub>, CO<sub>2</sub> emissions from construction sites and avoid nuisance and dust complaints.

A method statement shall be prepared and adopted as part of the Construction Management Plan to minimise gaseous and particulate matter emissions generated during the Construction Phase. The method statement shall identify the specific measures which will be implemented to control air pollution emissions during each of the following stages of the Construction Phase: (a) demolition; (b) ground breaking; and (c) construction/build.

The Construction Phase shall be carried out in accordance with the Best Practise Guidance Note "Control of dust and emissions from construction and demolition" published by London Councils, 2006. The risk rating of the site shall be defined in the method statement and determined using the risk assessment methodology in the Best Practise Guidance. Techniques to control dust from construction activities and emissions from vehicles and plant, and undertake air quality monitoring, shall conform to the 'medium' or 'high' risk categories outlined in the Best Practice Guidance.

The following best practise measures shall be included as a minimum in the method statement:-

A - Techniques to control PM<sub>10</sub> and NO<sub>x</sub> emissions from vehicles and plant

- a) Low emission plant fitted with catalysts, diesel particulate filters or similar devices shall be used;
- b) Plant shall be well maintained, with routine servicing of plant and non-road mobile machinery (NRMM) to be completed in accordance with the manufacturers recommendations;
- c) Avoid the use of diesel or petrol powered generators and use mains electricity or battery powered equipment;
- d) Non-road mobile machinery (NRMM) shall use ultra low sulphur tax-exempt diesel and be fitted with appropriate exhaust after-treatment such as catalysts, diesel particulate

filters as stated on the approved list managed by the Energy Saving Trust. Details of the plant and control equipment shall be included in the method statement.

- e) All construction vehicles shall comply with the Euro 4 emissions standard and where possible use low emission fuels and alternative technology.
- f) Plant and vehicles shall be located way from the closest receptors or house in closed environments where possible.

#### B - Techniques to control dust emissions from construction and demolition

- a) Keep site fencing, barriers and scaffolding clean using wet methods;
- b) Buildings to be demolished shall be wrapped
- c) Provide easily cleaned hard standing for vehicles and clean using wet sweeping methods;
- d) Provide the use of wheel-wash facilities near the site exit. Fit wheel-washes with rumble grids to dislodge accumulated dust and mud prior to leaving the site to avoid carrying dust or mud off the site;
- e) Inspect internal haul routes for integrity and instigate necessary repairs to the surface as soon as reasonably practicable;
- f) Routinely clean the Public Highways and accesses using wet sweeping methods especially during dry periods;
- g) Impose and signpost maximum speed limits of 10 mph on surfaced haul routes and work areas within the Site;
- h) Ensure all vehicles carrying loose or potentially dusty material to or from the site are fully sheeted;
- i) Store materials with the potential to produce dust away from site boundaries;
- j) Sheet, seal or damp down stockpiles of excavated material held on site;
- k) Any loose materials brought onto the site shall be protected by appropriate covering
- l) The site shall be dampened down during the working day and again at the end of the day to reduce the amount that is re-suspended dust.
- m) Ensure water suppression is used during demolition operations;
- n) Ensure mobile crushing and screening plant and cement batching plant which are regulated under the Local Air Pollution Prevention and Control regime operate in compliance with a Part B Permit. This shall be submitted to the local authority prior to operation.
- o) Site personnel shall be trained in dust mitigation and a manager shall be present for managing dust on site.

### C - Air Quality Monitoring

- a) Throughout the Construction Phase continuous particulate matter (PM10) monitoring shall be undertaken. Two instruments will be deployed at the site boundary in a transect orientated to the prevailing wind direction, with a third monitor located at the nearest sensitive receptor. One monitor shall be co-located with an anemometer.
- b) Adequate quality assurance/quality control procedures shall be in place including monitor maintenance and calibration as well and data checking. PM10 data shall be collected automatically on an hour basis.
- c) A trigger action level for PM10 concentrations of  $200\mu\text{g.m}^{-3}$  (15 minute average) shall be used to identify incidences of elevated dust emissions at the site boundary. The development site shall comply with the trigger action throughout the demolition and construction phases.
- d) An on-site alert system (email or SMS) shall be in place to notify appropriate staff that the trigger action level has been reached. Immediate and appropriate measures can be put in place to rectify abnormal particulate emissions. A procedure shall be established to deal with abnormal dust emissions. All incidences of abnormal particulate emissions leading to breaches of the trigger action level, shall be documented in the site log book (date and time), with details of the action take to remediate dust emissions.
- e) An e-mail specifying details of any alert to be sent out to the Council's air quality officer as soon as practicable following any breach of the site trigger action level.
- f) An electronic report shall be submitted to the Council's air quality officer every three months summarising the following information from each monitoring site – 24 hour average PM10 concentration, date and time of any breach of the trigger action level with the 15 minute mean concentration, prevailing wind direction and details of the cause of elevated dust emissions and mitigation measures.
- g) The Council shall be notified of any changes to the location and operation of dust PM10 monitoring instrumentation.

- h) A 24-hour phone hotline shall be set up so that residents can complain about high dust or PM10 levels directly to the developer.

The following items shall be included in the method statement:

- a) A specific timetable identifying the start and finish dates of each phase, including dust generating activities and PM10 monitoring.
- b) An inventory of stationary and fugitive dust, PM10 and NOx emission sources with an explanation of how these will be mitigated in accordance with the London Council's Best Practise Guidance.
- c) A map identifying the location of dust generating activities, plant equipment associated with emissions to air and PM10 monitors.
- d) An air quality monitoring protocol prepared in accordance with the requirements of section C.

#### D - Techniques to reduce CO<sub>2</sub> emissions from construction vehicles

A commitment from the Owner that contractors' vehicles involved in construction and demolition work will adopt 'green fleet management practices' that will result in a 10% reduction in tail-pipe CO<sub>2</sub> emissions over the duration of the construction phase. A green fleet management plan included in the method statement identifying measures to improve vehicle efficiency and reduce CO<sub>2</sub> emissions from construction vehicles. This could include the use of fuel monitoring equipment in vehicles, eco-driver training, accreditation with FORS (Freight Operator Recognition Scheme run by TfL) or SAFED (Safe and Fuel Efficient Driving run by the DfT) and use of low carbon vehicles such as hybrid electric, electric and bio-methane.

**THE SECOND SCHEDULE**  
**Construction Management Plan**  
**Highway Measures**

A Construction Management Plan outlines how construction work will be carried out and how this work will be serviced (e.g. delivery of materials, set down and collection of skips), with the objective of minimising traffic disruption and avoiding dangerous situations and minimising the impact on local amenity. A Construction Management Plan should cover both demolition and construction phases of development. Details of the Construction Management Plan will relate to the scale and kind and location of the development and they should assess the impact on transport and on local amenity including road user amenity. Should any one of these criteria be considered not to be relevant, then specific justification, as to why that particular criterion is not relevant, will need to be provided. The Construction Management Plan should demonstrate that the following has been considered and where necessary the impacts mitigated:

*(Note the term 'vehicles' used here refers to all vehicles associated with the implementation of the development, e.g. demolition, site clearing, delivering of plant, material and construction, staff parking etc)*

- a) A brief description of the site, surrounding area and development proposals for which the Construction Management Plan applies.
- b) Proposed start and end dates for each phase of construction.
- c) The proposed working hours within which vehicles will arrive and depart.
- d) The access arrangements for vehicles.
- e) Proposed routes for vehicles between the site and the Transport for London Road Network (TLRN). Consideration should also be given to weight restrictions, low bridges and cumulative affects of construction on the highway. A map of the TLRN can be downloaded from the following site:-  
[http://www.tfl.gov.uk/assets/downloads/TFL\\_Base\\_Map\\_Master.pdf](http://www.tfl.gov.uk/assets/downloads/TFL_Base_Map_Master.pdf)
- f) Typical sizes of all vehicles and the approximate frequency and times of day when they will need access to the site, for each phase of construction.
- g) Swept path drawings for any tight manoeuvres on vehicle routes to the site.
- h) Details (including accurate scaled drawings) of any highway works necessary to enable construction to take place.

- i) Parking and loading arrangement of vehicles and delivery of materials and plant to the site.
- j) Details of proposed parking bays suspensions and temporary traffic management orders.
- k) Proposed overhang (if any) of the public highway (scaffolding, cranes etc.).
- l) Details of hoarding required or any other occupation of the public highway.
- m) Details of how pedestrian and cyclist safety will be maintained, including any proposed alternative routes (if necessary), and any Banksman arrangements.
- n) Details of how traffic associated with the Development will be managed in order to reduce congestion.
- o) Details of any other measures designed to reduce the impact of associated traffic (such as the use of construction material consolidation centres).
- p) Details of how any significant amounts of dirt or dust that may be spread onto the public highway will be cleaned or prevented.
- q) Details of consultation on a draft Construction Management Plan with local residents, business, local groups (e.g. residents/tenants and business associations) and Ward Councillors. Details should include who was consulted, how the consultation was conducted and the comments received in response to the consultation. In response to the comments received, the Construction Management Plan should then be amended where appropriate and where not appropriate a reason should be given why not. The revised Construction Management Plan should also include a list of all the comments received. You are advised to check your proposed approach to consultation with the Council before carrying it out.
- r) Details of any Construction Working Group that will be set up, addressing the concerns of surrounding residents, as well as contact details for the person responsible for community liaison on behalf of the developer, and how these contact details will be advertised to the community.
- s) Details of any schemes such as the "Considerate Contractors Scheme" that the project will be signed up to should form part of the consultation and be notified to the Council. Contractors will also be required to follow the "Guide for Contractors Working in Camden" also referred to as "Camden's Considerate Contractor's Manual"
- t) Details of other construction sites in the local area and how your Construction Management Plan takes into consideration the cumulative effects of construction local to your site.
- u) Any other relevant information with regard to traffic and transport.

v) The Construction Management Plan should also include the following statement:

*"The agreed contents of the Construction Management Plan must be complied with unless otherwise agreed with the Council. The project manager shall work with the Council to review this Construction Management Plan if problems arise in relation to the construction of the Development. Any future revised plan must be approved by the Council and complied with thereafter."*

**It should be noted that any agreed Construction Management Plan does not prejudice further agreement that may be required for things such as road closures or hoarding licences**
