

Garden Flat
20 Thurlow Road
London
NW3 5PP

22nd February 2012

Design & Access Statement: Retrospective Application for Planning Permission

Design

The design and installation is of a new green larch timber trellis set against the garden face of the existing boundary wall to the west of the property. They have been designed and constructed in a quality and sustainable material and set to a height which compliments the scale of the original garden wall when viewed from Lyndhurst Terrace.

The material will ensure they age naturally in keeping with the local area with complimentary planting (climbers) to enhance its appearance.

Access

Access to the property remains is unaffected by the proposals.
