Design and access

1a Mall studios, tasker road, NW3 2YS

Proposal

The application is to move the front door access c.10 metres further down path and block up current door access.

Relevant Policies

S1/S2 sustainability development
B3 alterations & extensions
Camden planning guidance 2006

Design

The proposal replaces the current door further down the property (along the passageway wall) where access will provide a lot more light for the building.

The proposal is not harmful for neighbours as access to the pathway is the same dimensions all the way down. There is no visual loss to privacy to any neighbourhood properties. The area is also not visible from the road..

Access

Access to the house is unchanged

Style of Door

Will be the same as current one which is a panel Victorian wood door.
