Argyle Street
London WC1H 8ND

To Whom It May Concern:

In reference to application **2011/2835/L** approved on 07/09/2011, we are seeking to discharge **condition 4a** as follows:

- i. **Statement of structural alterations necessary to reposition the doorway:** To reposition the doorway between reception room and kitchen, we first intend to remove the existing door and architrave and save for re-use. We will then infill the existing opening using timber stud and plasterboard to match the existing construction of the remaining, modern wall. We will then create a new opening in the position shown on the drawings using a timber frame and lintel of standard construction. We will then place the existing re-used door in the newly created opening. The wall will then be skim-coated with plaster, and the existing architrave will be re-used around the opening.
- ii. **Photographs:** Please see attached.
- iii. How you intend to make good the affected areas: Please see 'i' above. As stated materials used (timber, plasterboard, and plaster) will match the existing modern wall as much as possible.

Best regards,

Adam Mezan
