Alex,

Please find below the comments emailed to Barry on Monday

With regards a plant list they would be drought tolerant plants such as lavenders, rosemary, sages, thymes, hebes, santolina, but these would still require additional irrigation to establish and ongoing irrigation to keep them alive.

Kind regards
Adrian

Adrian,

Thank you for your email.

The preference would be for the plug planted wildflower specification at 54 South Hill Park. Can you please confirm this is possible?

Regarding 56 South Hill Park, the submitted spec identifying 400mm depth of soil is fine, I just need to know what is to be planted into the ground.

Kind regards,

Alex Hutson

Alex,

Further to our conversation I can the following specification would be suitable for the number 54 South Hill park road, and could be irrigated by hand instead of automatically.

If you could confirm that this specification is acceptable then I will go ahead and offer a quotation.

Please can you confirm that the agreed planting will be for 56.

Kind regards
