

**FOR ELECTRONIC DATA ISSUE**  
Electronic data / drawings are issued as "read only" and should not be interrogated for measurement. All dimensions and levels should be read, only from those values stated in text, on the drawing.

AREA MEASUREMENT

The areas, approximately, and can only be verified by a detailed physical survey of the completed building. Any decisions to be made on the basis of these predictions, whether as to project viability, pre-fitting, lease agreements or the like, should include due allowance for the increases and decreases inherent in the design development and building processes. Figures relate to the heavy areas of the building at the car park (see Table 1). The internal area (IWA) includes measurement from the centre of the column. Net Internal Area (NIA) includes measurement from the Code of Measuring Practice, 6th Edition (RICS code of Practice). All areas are subject to Town Planning and Conservation Area Consent, and detailed Rights to Light analysis.
