

The Practice

National award-winning practice Robert Dye Associates is based in NW London, and has more than 20 years experience in the design and management of domestic/residential architecture. Architectural project experience ranges from new-build houses, careful restoration and conversion of existing buildings for residential and commercial use, to international museum and university buildings.

Following RIBA regional success in London, the practice received the profession's highest award for residential architecture in 2005, winning the RIBA Manser Medal for a sustainable modern house in a sensitive conservation area context in Southwark.

The practice has a burgeoning reputation for delivered projects that have sustainability at their core, and has well-established contacts with structural and environmental engineers, quantity surveyors, and landscape/arboricultural consultants who are sympathetic to the studio's particular approach within new and existing contexts.

Typically the studio manages projects from inception through all stages to completion; it has extensive experience of preparing construction documentation and administering building contracts on site, from one-off residential to large-scale public works. The practice is particularly experienced in London's complex urban and suburban context, whether building new or modernising and extending historic residential buildings.

The work of Robert Dye Associates has been televised in the UK and Japan, the subject of various exhibitions in London over the last decade, and is regularly published in the architectural press worldwide.

Principal, Robert Dye BA Hons Dip Arch RIBA

Robert won the annual RIBA student prize before graduating with honors in 1977. He has practised architecture both in England and abroad. Working for Sir James Stirling, his major projects included the Clore Gallery at the Tate, London, and as project architect a new-build expansion of the Fogg Art Museum for Harvard, and a new Performing arts Centre for Cornell University.

Since establishing his own practice in 1989, he has continued the successful pursuit of design quality in more fine-grain, predominantly residential work. The practice's (timber-framed/recycled materials) new-build Stealth House was a finalist for a RIBA sustainability prize, then for the European Conference of Leading Architects annual Putz prize, and picked up the prestigious Manser Medal for 2005's best contemporary house at the Stirling Prize ceremony.

Robert has taught sustainability, architecture and urban design at various universities in the UK and America for more than 20 years, and is currently a lecturer on sustainable cities for the Urban Design Masters course at the Bartlett School, University College London.

He has received several awards, contributed to a BBC2 programme on the future of London's architecture, was a member of the LDDC Urban Design Advisory Group shaping the future of Docklands, and is active in judging architecture awards for the RIBA.

Stealth House, Grove Lane, SE14 - Manser Medal winning semi-detached house, adjoining Conservation Area

Newcombe Park, NW7 - Extension & modernisation of detached house

Kingsdown Street, NW1 - Partial rebuild & extension to 1930s 4 conservation area new house

Hamilton Terrace NW8 - Extension & modernisation of grade II listed terrace house
