Summary of consultation responses:		Site notice, 02/11/2011 – 23/11/2011; press advertisement, 10/11/2011 – 01/12/2011. The IRS proposals have been the subject of full consultation by LB Camden Housing Mechanical & Electrical Capital Delivery Team with all residents of the blocks affected as part of the statutory process of notifying tenants and leaseholders about the submission of this planning application. This has included a residents meeting organised by Housing Officers. No formal representations have been received either in response to this consultation or the site/press notices.					
CAAC/Local groups* comments: *Please Specify		Bartholomew CAAC was formally consulted: no response was received.					

Site Description

The site comprises of a three-storey residential block located on the northern side of Lawford Road, similar residential buildings adjoin to the west and east. The host building is not listed nor has it been identified as being positive contributor to the Bartholomew Estate Conservation Area.

PPG8: Telecommunications, August 2001

CLG Householder's Planning Guide for Installation of Antennas, including satellite dishes

Assessment

The Proposal

1. The proposal is for the installation of 2 communal satellite dishes, an antenna and a light grey cabinet mounted on the western (side) gable end of the residential block. New brown cables would run from the main cabinet along the front (south) facade, leading to each of the individual flats of the residential block. A power cable would run from the main cabinet along the front facade to the main hall entrance, where the power is located.

Background/ Context

2. This is one of a number of similar applications by LB Camden to replace TV reception equipment on its buildings so that tenants will be able to benefit from digital TV transmissions after the switch over from terrestrial in 2012.
3. The IRS (Integrated Reception System) includes one aerial and two satellite dishes to be installed on blocks where dwellings share a communal aerial system. The work would normally come under permitted development but a planning application is required in this case as the building lies within a Conservation Area.
4. The equipment needs to be positioned so as to ensure optimal reception taking into account the effect of mature trees and taller buildings in the vicinity on interference while at the same time seeking to minimise its visual impact. The position of equipment and the cable runs leading up to it also has to be safely accessible for maintenance, while at the same time being out of easy reach from dwellings to avoid tampering.
5. Relevant guidance contained in PPG8 (para 66) and the government's Planning Guide for Householders strongly encourages the "sharing of masts and sites" to keep visual intrusion to a minimum, such as by communal masts/dishes where there will be a number of users in a single building. The proposed equipment will provide an opportunity to enable the removal of a number of existing haphazardly installed satellite dishes by individual residents that have accumulated in recent years where these duplicate the service offered by the IRS. Such paraphernalia would in most cases have been installed without the necessary consent, or exist under Permitted Development rights which are automatically subject to a condition that the equipment be removed when no longer required. It is understood that a separate contract

will be let by LBC to carry out this removal work.

Design considerations

6. The block is proposed to be served by 2 x 800mm diameter receiver dishes and a 3m pole-mounted aerial mounted at the second floor level on the western side elevation wall of the residential block. Given the equipment would be located at the second floor level, it would not be highly visible from the ground level except in more distant views where it would be barely noticeable against the greater bulk of the residential block. The pole mounted antenna would protrude no more than 2 metres above the roof and would be similarly insignificant against the bulk of the building and similar in scale and appearance to other forms of domestic TV receiving equipment which are now an established part of almost any streetscene. The light grey equipment cabinet would measure 700x500mm and would not be highly visible from the public realm given it is relatively small.
7. The new brown cabling would run from the main cabinet in bunches to serve the living rooms of the each of the flats in the residential block. It would run along the south facade which fronts Lawford Road and would match the colour of the brickwork and therefore would reduce its visual impact along the streetscene. A power cable would run from the main cabinet along the front facade to the main hall entrance, where the power is located. The colour of the power cable has not been specified and to reduce its visual impact, a condition will be imposed for the cable to match the brickwork as closely as possible.
8. Subject to the colour of the cabling which can be conditioned, it is considered that the proposed work takes all reasonable measures to minimise its impact on visual amenity as required by relevant guidance. As a result of this it is considered that there would be no significant impact either on the visual appearance of the block or the character and appearance of the conservation area. Furthermore, except for where the cables enter living room windows, the equipment has been placed well out of the way of peoples' flats so will not cause disruption to the amenities of residents. The proposal therefore accords with policies CS14, DP24, DP25 and DP26 and is considered to be appropriate.
9. It is recommended that an informative is attached to any approval reminding of the need for all existing unauthorised or superseded equipment to be removed. A condition will specify that when the proposed equipment is subsequently no longer required it is removed in order to minimise the impact on the appearance of the building.

Recommendation: Approve.

DISCLAIMER

Decision route to be decided by nominated members on Monday 19th December 2011.
