### Walkways

HAS are proud to announce the arrival of our range of walkway products. HAS can now offer full CAD design, fabrication, installation and future maintenance with a minimum of 20 years guarantee for all walkway products. The performance has been coupled with sustainability, ease of use and practical installation considerations to ensure a product of outstanding quality that is fit for purpose and looks good.

### The Ideal Rooftop Walkway System

The walkway system is manufactured from Glass-reinforced plastic or GRP is a composite material made of a plastic matrix reinforced by fine fibers made of glass. The walkway surface is treated with an aluminium oxide compound to ensure a long lasting slip free finish. All fixings are supplied in stainless steel to ensure longevity.
