1.0 INTRODUCTION

- 1.1** The Stilwell Partnership has been instructed by Alex Bard, to undertake a Transportation Statement to support a Planning Application for the proposed redevelopment at 134a and 136 Gloucester Avenue, Camden, NW1 8JA.
- 1.2** The purpose of this study is to advise the Local Authority, the London Borough of Camden, of the Transportation Impact that the proposed development could have on the local highway network.
- 1.3** In **Section 2** we detail the Local and National Planning Policies; in **Section 3** we detail the site location in relation to the highway network and describe the existing and proposed development. **Section 4** outlines the likely highway impact. **Section 5** details the sustainability of the site and **Section 6** concludes the report.

2.0 PLANNING POLICY CONTEXT

- 2.1** This section of the report provides a summary of the policy documents which are relevant to the proposed development. These include: The Transport White Paper – Creating Growth, Cutting Carbon, PPG13, the London Plan, The Mayor’s Transport Strategy, The Adopted Camden Core Strategy and Camden Transport Plan.

TRANSPORT WHITE PAPER – CREATING GROWTH, CUTTING CARBON (JANUARY 2011)

- 2.2** ‘Creating Growth, Cutting Carbon’ sets out the government objectives for a greener and safer transport network that encourages economic growth and improves quality of life for communities.
- 2.3** The White Paper encourages the implementation of sustainable local transport systems and aims to remove the previous top-down approach to transport planning. Local Authorities will have the power to implement and tailor transport systems and schemes based on local needs and behaviour.
- 2.4** The economic aims of the White Paper can be achieved by increasing access to employment and services, reducing carbon emissions, increasing public transport accessibility, and as a by-product, increasing the number of people using safer transport methods with wider health benefits.
- 2.5** The White Paper notes the key role of travel planning in achieving government objectives, as set out below:

“The Government wants to encourage and enable more sustainable transport choices. [...] In transport terms, this might be exemplified by reducing unnecessary signs, posts and other street clutter to improve road safety and encourage walking, by travel planning, or by presenting information in such a way as to encourage choice”

- 2.6** Successful travel planning schemes are noted and used as examples within the White Paper, including Travel Planning for Schools, Cycle Journey Planning and Area-Wide Travel Planning. At Cambridge Science Park an initial investment of £70k brought about £200k benefits and a 5-6% reduction in journey times. The success shown in the White Paper Case Studies should be used to encourage the implementation of other travel planning schemes.

PPG13 (TRANSPORT), MARCH 2001

- 2.7** PPG13 sets out the Government's policies on transport. These inform the regional planning bodies and local planning authorities in preparing regional planning guidance and development plans.
- 2.8** Quality of life depends heavily on transport and easy access to jobs, shopping, leisure facilities and services. A safe, efficient and integrated transport system is needed to support a strong and prosperous economy, but the continual growth in road traffic is damaging our towns and cities and undermining attempts at sustainable development.
- 2.9** The focus, therefore, is on delivering an integrated transport strategy to help reduce the need to travel, reduce the length of journeys and make it safer and easier for people to access jobs, shopping, leisure and services by public transport, walking and cycling. In turn, this will enable people to make more sustainable transport choices. The guidance also promotes mixed-use developments, which it sees as providing significant benefits in terms of promoting vitality and diversity.
- 2.10** The stated objectives are to:-
- Promote more sustainable transport choices for people and for moving freight;
 - Promote accessibility to jobs, shopping, leisure facilities and services by public transport, walking and cycling; and
 - Reduce the need to travel, especially by private car.

THE LONDON PLAN (JULY 2011)

- 2.11** The London Plan sets out policies on matters that are of strategic importance to Greater London over the next 15 to 20 years. The London Plan seeks to make more sustainable and efficient use of land in London and encourages higher density development to maximise the potential of development sites.
- 2.12** High standards of design and construction are encouraged as are improvements to the conditions for walking and cycling and the inclusion of priority measures for buses.

THE MAYOR'S TRANSPORT STRATEGY (JANUARY 2010)

- 2.13** The Mayor's Transport Strategy supports the aims of the emerging London Plan by promoting the necessary investment to accommodate London's growing population and economic activity in a sustainable way.
- 2.14** London's streets are often congested and poorly maintained and businesses, pedestrians, residents, bus passengers, taxis, cyclists and all road users suffer as a result. Priorities for action include: tackling congestion and reducing the impact of traffic; making streets safer and more secure; managing the use of street space more effectively; and making streets more attractive.
- 2.15** The strategy aims to reduce the growth of traffic in London over the next ten years, especially in central London, where the worst congestion occurs. Alongside improving public transport, the strategy adopts the principle of a congestion charging scheme in a zone in central London.
- 2.16** Effective links, to Europe and beyond, are vital to London's role as a world city and the financial capital of Europe. The strategy promotes projects to provide efficient and environmentally sustainable public transport.
- 2.17** The Mayor's vision is to develop London as an exemplary sustainable world city, based on strong and diverse economic growth, socially inclusive for all, and future success depends upon fundamental improvements in the environment and use of resources.

LONDON BOROUGH OF CAMDEN CORE STRATEGY (NOVEMBER 2010)

- 2.18** The Core Strategy sets out the long term vision, spatial strategy and strategic planning policies within the borough.
- 2.19** The Core Strategy sets out policy which includes 'CS11 - Promoting Sustainable and Efficient Travel'. The aims of Policy CS11 is to promote the delivery of transport infrastructure and the availability of sustainable transport choices in order to support Camden's growth, reduce the environmental impact of travel, and relieve pressure on the borough's transport network.

2.20 In order to support Camden's growth and to promote walking, cycling and public transport, the Council will:

- Improve public spaces and pedestrian links across the borough, including by focusing public realm investment in Camden's town centres and the Central London area, and extending the 'Legible London' scheme;
- Continue to improve facilities for cyclists, including increasing the availability of cycle parking, helping to deliver the London Cycle Hire Scheme, and enhancing cycle links; and
- Work with Transport for London to improve the bus network and deliver related infrastructure, and support proposals to improve services and capacity on the tube, London Overground and Thameslink.

2.21 As part of its approach to minimising congestion and addressing the environmental impacts of travel, the Council will:

- Expand the availability of car clubs and pool cars as an alternative to the private car;
- Minimise provision for private parking in new developments, in particular through car free developments in the borough's most accessible locations and car capped developments;
- Restrict new public parking and promote the re-use of existing car parks, where appropriate;
- Promote the use of low emission vehicles, including through the provision of electric charging points; and
- Ensure that growth and development has regard to Camden's road hierarchy and does not cause harm to the management of the road network.

LONDON BOROUGH OF CAMDEN TRANSPORT STRATEGY (AUGUST 2011)

2.22 The Camden Transport Strategy sets out the long term goals and transport objectives for the borough. The Transport Plan aims to describe the context of traffic and transport in the borough, the challenges faced and how, through the objectives and actions outlined in the Strategy, these challenges can be addressed.

2.23 The Strategy sets out nine key objectives, outlined below:

- *Objective 1:* Reduce motor traffic levels and vehicle emissions to improve air quality, mitigate climate change and contribute to making Camden a 'low carbon and low waste borough.'
- *Objective 2:* Encourage healthy and sustainable travel choices by prioritising walking, cycling and public transport in Camden.
- *Objective 3:* Improve road safety and personal security for people travelling in Camden.
- *Objective 4:* Effectively manage the road network to manage congestion, improve reliability and ensure the efficient movement of goods and people.
- *Objective 5:* Develop and maintain high quality, accessible public streets and spaces and recognise that streets are about more than movement.
- *Objective 6:* Ensure the transport system supports Camden's sustainable growth and regeneration as well as enhancing economic and community development.
- *Objective 7:* Ensure the transport system supports access to local services and facilities, reduces inequalities in transport and increases social inclusion.
- *Objective 8:* Ensure that the provision of parking is fair and proportionate by considering the needs of all users, whilst also encouraging sustainable travel choices.
- *Objective 9:* Support the delivery of a successful London 2012 Olympic and Paralympic Games.

3.0 SITE LOCATION AND EXISTING / PROPOSED DEVELOPMENT

Existing Site

- 3.1** The site currently consists of a two-storey B1 office/light industrial unit with a footprint of 554sqm. A Site Location Plan is included at **Appendix A**.

Site Location

- 3.2** The site is located to the north of Gloucester Avenue. Gloucester Avenue is characterised by residential housing with some office and shop use. The nearest convenience shops and services can be found on Haverstock Hill / Chalk Farm Road within 250m of the site, including restaurants, schools, high street stores, supermarkets and a gym.
- 3.3** Gloucester Avenue is a residential road and junctions with Regents Park Road at its start and terminus. There are wide and well-lit footways on both sides of the road. Gloucester Avenue is within a 30mph speed limit.
- 3.4** Regents Park Road is a minor road offering access to the residential area to the south of the Chalk Farm railway junction. Regents Park Road offers connections to the A502 and A503, major routes to the North Circular and across North London. There are wide, well-lit footways on both sides of the road. Regents Park Road has a 30mph speed limit.

Proposed Development

- 3.5** The proposals will include the development of a four-bedroom detached house to the east of the site, with a flexible commercial unit to the west of the site comprising 224sqm Gross Internal Space (B1 use). A Proposed Site Layout is included at **Appendix B**.
- 3.6** Pedestrian access to the site will be directly from Gloucester Avenue (to the south of the site) via the existing shared use driveway. Footways on Gloucester Avenue will allow safe access to the development site.

Parking

- 3.7** No residential parking will be provided at the site. This is in line with London Borough of Camden parking standards. Residents of the new units would not be able to obtain parking permits to park in the CPZ bays managed by Camden Council. This can be secured via a standard S106 agreement if deemed appropriate.

3.8 PPG13 Paragraph 51 clearly states

“Local authorities should not require developers to provide more spaces than they wish, other than in exceptional circumstances”.

3.9 Servicing

Servicing will take place for the flexible commercial accommodation. Cars and small vans will be able to access the site unit via the driveway from Gloucester Avenue as per the historic access arrangement. A servicing bay will be provided within the site for vehicles servicing and delivering to the flexible commercial accommodation.

3.10 Servicing arrangements will however, be improved by the provision of a 5m long turning table within the courtyard area. This will allow servicing vehicles to enter and leave the site in a forward gear. In discussions with the Highways Officer for the London Borough of Camden, it was confirmed that turntables are acceptable in Camden.

4.0 HIGHWAY IMPACT

4.1 When undertaking a Traffic Impact Assessment (TIA) for a new site, it is normal practice to consider the likely impact of the proposed development in the peak hours, i.e. when the combination of the existing traffic and the proposed is at its highest. However, as the development will not provide any parking and as the site is within a CPZ, the ability to park will be very limited and therefore there will be **no significant highway impact**.

5.0 SUSTAINABLE TRANSPORT ISSUES

Pedestrians

- 5.1** Pedestrians will be able to access the building from Gloucester Avenue.
- 5.2** The nearest Bus Stops are located within 200m of the site on Adelaide Road (outside Chalk Farm Underground Station).
- 5.3** There is a pedestrian island at the northern junction between Gloucester Avenue and Regents Park Road, making it safe for pedestrians to cross to the facilities on Regents Park Road. There is also a footbridge over the railway, connecting Gloucester Avenue with Adelaide Road, offering access to the closest bus stops, shops and services.
- 5.4** For pedestrians without mobility impairment, the Institution of Highways and Transportation (IHT) in their publication, 'Guidelines for Providing for Journeys on Foot 2000' make a series of suggested acceptable walking distances in relation to some common facilities. **Table 1** below, sets out suggested acceptable walking distances in relation to some common facilities.

Table 1 – Suggested Acceptable Walking Distances

	Town Centres, Retail	Employment, School, Tourism	Elsewhere
Desirable	200m	500m	400m
Acceptable	400m	1,000m	800m
Preferred Maximum	800m	2,000m	1,200m

- 5.5** There is a large shopping area located to the north of the site on Haverstock Hill / Chalk Farm Road offering restaurants, schools, high street stores, supermarkets and a gymnasium. The site is also located close to 'The Roundhouse' entertainment venue (200m) and Primrose Hill (400m).
- 5.6** Footways along Gloucester Avenue and the surrounding roads are lit, wide and well maintained and pedestrian activity in the area has been observed to be high.
- 5.7** In terms of geographical location, it is clear that the site is well located for pedestrian accessibility to a wide range of local amenities and facilities. This is to be expected given the urban location of the development site.

Cyclists

- 5.8** Planning Policy Guidance 13 (PPG13) defines a distance of 5,000m, within which 'cycling can reasonably be considered as an alternative to travelling by private car'. On the basis of a relatively slow cycling speed of 15kph, this distance could be achieved in 20 minutes.

- 5.9** Haverstock Hill / Chalk Farm Road is within 250m of the site and could be cycled to in 1 minute. Other centres within cycling distance include Kentish Town, Regents Park and Hampstead (all within 2500m / 10 minute cycle). This would suggest that a high proportion of trips to and from the site could potentially be undertaken by cycle.

On Site provision

- 5.10** Cycle storage for 4 bicycles will be provided for the development in line with London Borough of Camden requirements, (2 for commercial use and 2 for residential).

Buses

- 5.11** The development site is served by a number of scheduled bus services, including the No's 31, 168, 393 and 274 with the nearest bus stops located within 200m of the site. The IHT document 'Guidelines for Public Transport in Developments' dated March 1999, states that the maximum walking distance to a bus stop should not exceed 400m and preferably be no more than 300m. Clearly, the bus stops closest to the development site comply fully with these criteria.

- 5.12** Below is a brief summary of the bus services as mentioned above and timetables are included in **Appendix C**.

Service 31 – White City to Camden Town

- 5.13** With buses running from 05:00 to 01:15 every day, there are peak hour services every 6 minutes and off-peak services at least every 15 minutes. Destinations include Camden Town Station, Kilburn High Road Station, Notting Hill Gate and White City. The bus stop for this service can be found on Adelaide Road, 200m from the site.

Service 168 – Hampstead Heath to Old Kent Road

- 5.14** With buses running from 05:00 to 01:07 every day, there are peak hour services every 6-7 minutes and off-peak services at least every 15 minutes. Destinations include Elephant and Castle, Waterloo Station, Russell Square and Hampstead Heath. The bus stop for this service can be found on Adelaide Road, 200m from the site.

Service 393 – Clapton to Chalk Farm

- 5.15** With buses running from 05:22 to 01:03 Monday to Saturday (with a reduced service on Sundays), there are peak hour services every 12 minutes and off-peak services at least every 20 minutes. Destinations include Kentish Town Station, Highbury and Islington Station, Green Lanes and Clapton Pond. The bus stop for this service can be found on Adelaide Road, 200m from the site.

Service 274 – Lancaster Gate to Islington

- 5.16** With buses running from 04:50 until 01:00 every day, there are peak hour services every 7-8 minutes and off-peak services at least every 20 minutes. Destinations include Islington Angel, The Zoo, Lancaster Gate and Marble Arch. The bus stop for this service can be found on Regents Park Road, 600m from the site.

Trains

- 5.17** Chalk Farm London Underground station can be found 250m north of the site, and provides regular services on the northern line between Morden and Edgware / High Barnet. There are typically trains at least every 5 minutes, running approximately between 05:30am and 01:00am. Other destinations on this line include Camden Town, Euston, Leicester Square and Waterloo. Chalk Farm Station is within London Travelcard Zone 2.
- 5.18** Kentish Town West mainline railway station can be found 800m north of the site. This railway station operates on the London Overground network and offers services to Richmond, Stratford and Clapham Junction. There are services running approximately between 06:00am and 00:30am, with trains departing every few minutes during peak hours.

PTAL

- 5.19** Public Transport Accessibility Levels (PTALs) are a highly detailed and accurate measure of the accessibility of a given point to the local public transport network, taking into account the walk time and service availability.
- 5.20** By generating a PTAL level for the site itself, the result did not take into account the close proximity of bus stops and Chalk Farm Underground Station (all within 250m, accessible via a footbridge over the railway line).
- 5.21** Generating a PTAL level from the other side of the footbridge, only 150m walk north of the site delivers a PTAL **Level 5** (see **Appendix D**) which rates as **“Very Good”** site in TFL’s PTAL Guide. This is a fairer representation of public transport accessibility for the site.

Summary

- 5.22** Taking into consideration the objectives of PPG 13, together with the good public transport network, we consider that the surrounding infrastructure for this development is sufficient to maximise its potential and provide good links to local shops, facilities and services.

6.0 CONCLUSIONS

- 6.1** The Stilwell Partnership has been instructed by Alex Bard, to undertake a Transportation Statement to support a Planning Application for the proposed redevelopment at 134a and 136 Gloucester Avenue, Camden.
- 6.2** We have shown that the site is in a sustainable location with good links to public transport, shops and employment opportunities.
- 6.3** We have shown that the sites accessibility and PTAL score (5) is rated as “Very Good” by TfL.
- 6.4** The site will provide a servicing bay for the commercial accommodation as discussed with London Borough of Camden. This bay will allow for the servicing of the flexible commercial units.
- 6.5** 4 No. secure cycle parking will be provided in line with London Borough of Camden requirements.
- 6.6** No occupiers or users of the development will be eligible for local parking permits; this can be secured using a S106 Agreement.
- 6.7** The provision of turning table will improve servicing arrangements, allowing the very small number of service vehicles to enter and leave in a forward gear.
- 6.8** In summary, we conclude that the proposed development can be accommodated without detriment to vehicular flows and road safety on the surrounding highway network.
