Subject: Tree roots

TO WHOM IT MAY CONCERN

Dear Sirs

Following my telephone conversation with your office earlier to day, here are details concerning a tree of which the roots are causing serious damage on my land and property

My Contact Details

Name	Albert Carson
Address	69 Springfield Road, London NW8 0QJ
Telephone office	020 7586 2474
Mobile	07790745610
Email	{ HYPERLINK "mailto:ac@jlcit.com" }

The property	45 Goldhurst Terrace, London NW6 3HB (owned by me)
The tree	Sited in the front garden

I request permission to have the tree either felled or pruned up to 50% (providing the latter will prevent future root growth)

The roots of the tree have lifted all the paving slabs which are now laying unevenly and causing rain down pour to flow into the walls at the side of my house, resulting in penetration of water, dampness and damage to the fabric of the walls. There are signs of possible subsidence occurring and the roots spreading towards the main drains. If immediate action is not taken to stop this root growth I will be faced with much worse to come.

It would be very much appreciated if you would kindly arrange a site visit at the earliest possible time. I can be contacted on either of the above telephone numbers or by email to fix a time to meet

Yours sincerely
Albert Carson
