#### 3. Description of the Proposal

Please provide a description of the proposal, including details of the proposed demolition:

The project seeks to redefine an existing CHB Quennell villa in Hampstead, London, to suit the needs of a modern young family. Built around the turn of the twentieth century, the existing house remains largely unchanged from its original configuration and this integrity will be maintained through the realisation of this project. The proposal aims to reconfigure the existing arrangement of room functions, e.g. relocating back of house utility spaces in the new basement. This will open up the existing interiors and release the full potential of the existing plan. Window openings will be enlarged in places to increase daylight levels to the interiors. Lateral and vertical connections between rooms will be enlarged to create light connective interiors associated with architecture of the current time. An enlarged basement will provide recreational space including a swimming pool, gymnasium, pilates room and garden room. Terraces and loggia will connect interiors to the gardens surrounding the house. The surrounding gardens will be redesigned and replanted.

A small percentage of the existing south and west facing elevations will be demolished to create openings to the new extensions. The existing roof will be removed and replaced to match existing to facilitate construction of the project, increase the thermal performance and extend the life expectancy of the building.
