

**NORTH SUITE, GROUND FLOOR, 184-192 DRUMMOND STREET,
LONDON**

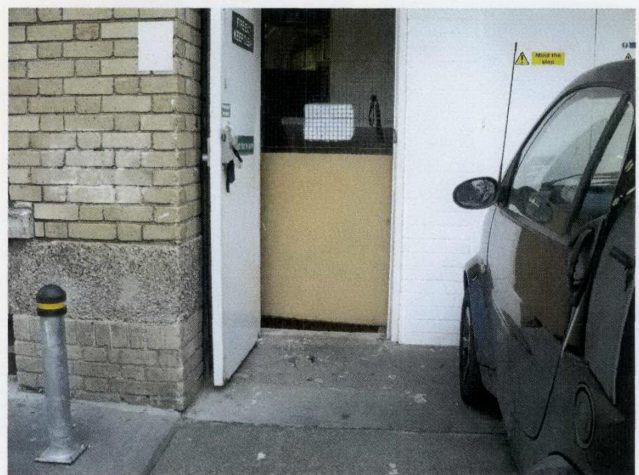

DESIGN STATEMENT

The Suite is located on the Ground Floor of an old Warehouse and industrial building.

The original loading bay doors have been bricked up in the past and high level windows installed.

The Suite can therefore be accessed via a single door and has an additional fire escape door.

Existing photographs, see right, show the proposed area to install the main pedestrian entrance to the Suite.

The proposal is to remove the Crittal steel window and reform brickwork reveals and install a set of powder coated aluminium double entrance doors.

The proposal forms part of the upgrading of the building where the adjacent suite will be refurbished, frosted and Georgina wired panes taken out and clear glass put back.
