

## **SIGNAGE SPECIFICATION**

Detailed below is the specification for construction and fabrication of the brackets and frame for proposed signage onto buildings as indicated by the accompanying drawings.

### **Steel Frame**

- 8mm flat steel plate with 4 x 14mm holes centred in the corners 40mm in from each edge.
- 50mm x 50mm x 5mm steel box section cut down to 200mm in length and welded to centre of above plate.
- 5mm rolled steel loop welded to the end of the box section to create a guide for the wire rope.

All the above is cleaned and painted prior to installation
