Hello Tom,

Thank you for your prompt reply.

As we discussed on the phone, we have a tree which rapidly falling down.especially last few weeks after the heavy winds. We are very concern that the tree is positioned in the drive at the front of the house where we use a lot. We walk under it and also we parked our cars there. You told me that it is a lime tree and our address is;

44 Queen's Grove
St John's Wood NW8 6HH

Please also find attached photo of the tree.

Kind regards,
Refika Ratib

Hello,

Please find attached the list of contractors as promised.

If you could reply to this message stating the species position and address of the tree and that it is dangerous then I can get the paperwork arranged. I'd be very grateful if you can attach the photos also.
