Existing Window

Proposed Window

The sample window, as manufactured by Crittall Windows Ltd, has been installed to the Lower Ground Floor to the South East Elevation. As illustrated in the images above, the window is a replica of the original arrangement. The difference being the new window is provided with double glazed units with the glazing bars matchin the original. The proposed external glazing is provided with an anti-sun solar reflectant glass which gives a slight tint.

Crittall Windows Ltd have confirmed that they have ceased production of the small openable light located at the bottom of the window arrangement. Therefore this will now be a fixed light.
