

Supplementary Information

I carried out the site visit on 19 May 2009, and I was in the presence of Mr Walker, the Project Development manager for Community Solutions for Primary Care. All my observations were from ground level without detailed investigations and I estimated all dimensions unless otherwise indicated. I did not have access to trees outside the boundaries and observations of them are confined to what was visible from within the property. The weather at the time of inspection was clear, still and dry, and the visibility was good.

I was asked to inspect the trees and make appropriate recommendations for their management in order to establish acceptable levels of safety. I inspected each tree and have indicated the numbering on the site plan extract enclosed as sketch plan BT1. This plan is for illustrative purposes only and no measurements should be scaled from it. My observations, comments and recommendations are summarised in the attached table.

Please contact me if you require any further clarification on any of these points.
