Dear Joanna

Please find enclosed our application for approval of details reserved by condition for the above planning application (copy enclosed).

We have detailed our proposals on drawing 025/A/016 and summarise them as below:

The structural support frame will be minimally sized painted 'T' sections which will be fabricated to accommodate the varying form and geometry of the structure. The method of fixing the glass to the framework is by utilising 'structural silicone'. The extension is fixed to the house at the 'link'.

The glass will be structurally siliconed into minimally sized powder coated aluminium angles which are fixed back to the existing brickwork. Care will be taken to ensure that the resin anchor fixings coincide with a mortar joint both horizontally and vertically.

We trust these will meet with your approval in due course.

Yours sincerely

Amir Sanei
