RE: Specification for Tree Works at 153 Gloucester Avenue, NW1 8LA

Site of tree: Rear garden and overhanging 5 other gardens with difficult access through house.
– **London Plane.** Ht: 30 metres. Dia: 1400mm

Condition: In reasonable condition with major limb removed @ 8 metres and previously reduced/shaped by trimming small branches only.

Recommendations: Reduce crown of tree by up to 30% overall. This to be achieved by correct reduction of all branch frame-work back to an appropriate lateral to reform the crown to the reduced size as proposed. This should prevent excessive re-growth (epicormic growth) and die-back from the cut surfaces. Maximum size of cut to be 120mm
