Dear Sue

Re: 5a Agar Place, NW1. Revised drawings
indicating existing garage roof line.

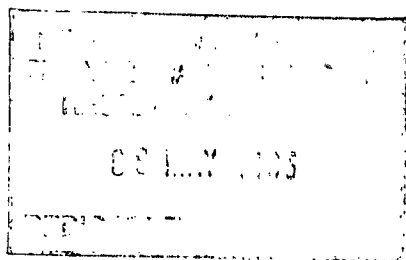

Further to your letter dated ? I enclose
the following: One covering letter and four
revised prints drawing, N^o 105/02 rev B. I trust
you will substitute the drawing you have N^o 105/02 rev A
for those enclosed.

As requested, I have indicated the height
and line of the existing garage roof in comparison
to the new proposed roof which I have further reduced
the height off. In addition the rear garden wall
has been reduced from the earlier proposed height.
To conclude both the rear wall and roof have
not increased by more than one metre above the
existing garage roof and wall.

I trust you will find the information
you need for your report, and should you
have any further queries please contact me as
soon as possible.

Yours Faithfully

Dear Sue.

Re: 5a AGAR PLACE, CAMDEN, NW1.

Your ref PL/920094/81 CASE NO H12/28/7

Further to our meeting dated 28th April I enclose (4) copies of amended drawing N°s 105/01 A and 105/02 A for your approval. Changes include a reduction in first floor area to increase the access of daylight to the rear of N° 26 Agar Grove, and fenestration adjustments to the Agar Place elevation. In addition my client has opted for a redland interlocking concrete tile of the type used in the locality, instead of the decora sheet metal tile.

I trust you will find the amendments satisfactory and will recommend the scheme for approval under Delegated Powers as we discussed at the meeting. I look forward to an early decision and should you have any queries please do not hesitate to contact me.

Yours Faithfully

Dear Mrs Foster.

Re: 5a AGAR PLACE, Proposed improvements
with new 1st floor ancillary office for existing
Garage.

Further to our meeting yesterday
morning, I enclose four prints each of drawing
N^os 105/01 105/02 as requested. I trust the
prints will replace earlier submissions and will
be reviewed in their place.

I have made a conscientious effort
to match the new proposal as much as is
possible to the neighbouring building styles,
and hope this will be to your satisfaction.

I eagerly look forward to the results
of an early review of the design proposal I have
submitted.

Should you require any more
information please do not hesitate to contact
me.
