Dear Ms Read

**43-46 ARGYLE SQUARE LONDON WC1**

Further to our meeting at your office on 3 December and subsequently at the above property, I enclose two copies of the revised drawings for the proposed work to the rear additions. This shows the reduction in length of the rear additions to 5,800mm.

As you observed during the inspecting of the property, the present rear areas consist of a mixture of poor quality materials forming unattractive additions, of varying lengths, to the main buildings.

It is therefore our client's intention to greatly enhance the rear area of the above properties by constructing new rear additions which will be sympathetic to the main building, while providing adequate space for the needs of the occupants.

By shortening the length of the proposed back additions it reduces the largest of the existing additions resulting in more space between the properties at the rear, which front Argyle Street.

Can you please advise me, as soon as possible, when you will be in a position to make your recommendations and the date that the application will be considered by the Planning Committee.

Yours sincerely

*I.M. for Neil Panton*
