## Relevant policies

Set out below are the UDP policies that the proposals have primarily been assessed against. However, it should be noted that recommendations are based on assessment of the proposals against the development plan taken as a whole together with other material considerations.

London Borough of Camden Unitary Development Plan 2006

S1/S2 Sustainable Development

SD1 Quality of life

SD6 Amenity for occupiers and neighbours

SD7 Light, noise and vibration pollution

SD8 Disturbance

B1 General Design Principles

B3 Alterations and extensions

B4 Shopfronts, advertisements and signs

Appendix 1 Noise and Vibration

Camden Planning Guidance 2006

## **Assessment**

### **Design**

#### **Shopfront**

The existing shopfront consists of two large glazed windows with a set of glazed double doors. The proposed shopfront is also largely glazed and has double glazed doors. It also has a blue glazing panel adjacent to the double doors. Above the shopfront is clear glazing with applied translucent film. The surrounding shopfronts are of a similar style with none having traditional shopfronts. It is considered that the proposed shopfront within the context of the existing shopfronts is acceptable in design terms.

#### **A/C Units**

The proposed a/c units are located on the rear of the building, which faces onto a laneway. The rear of the building is used for servicing the existing shops and has a number of existing a/c units. It is considered that the proposed units will not have a detrimental impact on the appearance of the rear of the building and are acceptable in design terms.

#### **Access**

The proposed shopfront has a level access to meet DDA requirements and in compliance with Policy SD1.

#### **Amenity/Noise**

The acoustic report submitted with the application demonstrates that the a/c units can operate within the planning noise conditions between the hours of 09:00 and 19:00. It is therefore recommended that in addition to the standard noise condition, a condition stating that the a/c units shall not be operated between the hours of 19:00 and 09:00 be added to the decision notice.

Subject to these conditions the proposed units will not result in a detrimental impact on the amenity of surrounding residential units.

#### **Advertisement**

The application relates to two white painted metal fascia signs each with internally illuminated letters. The non illuminated Samsung sign with the blue glazing panel adjacent to the doors is considered to have deemed consent under Class 5 of the Town and Country Planning (Control of Advertisements) Regulations 2007.

The regulations only permits the Council to consider amenity and public safety when determining applications for advertisement consent. The proposed advertisements as detailed above are internally illuminated. The site is within a row of shops, which have illuminated signs. In addition they are set back from the road and the illumination is not intermittent so they do not result in any public safety issues. As the site is not within a conservation area and there are a number of examples of similar signs they are considered to be of an acceptable design and do not harm the overall appearance of the building or the streetscene.

#### **Recommendation:**

- 1) Grant Planning Permission subject to conditions
- 2) Grant Advertisement Consent subject to conditions
