For the attention of Elaine Quigley

6th March 2008

By post and e-mail

Dear Sirs

106-109 Saffron Hill London EC1

Further to your letter of 12th February 2008, we now enclose the following;

1. A statement in support of the demolition of the existing building in accordance with PPG15
2. A revised BREEAM code 3 assessment prepared by Briary Energy Consultants.
3. A PDF detailing the 'green' roof we propose. In fact this will be a *brown* roof as supplied and detailed by Messrs Alumasc – their Zinco Extensive type roof.

We previously agreed with Stuart Minty that we could follow up the re-submission of our application with a Daylight-Sunlight report. The applicant has instructed this to be carried out and we envisage being able to forward this to support the application within the next 2 weeks.

I trust that you now have everything you need in order to validate the application. Hard copies of all the forgoing information have been posted to you.

Please do not hesitate to contact me if you require any further information.

Yours faithfully,

David R Mercer
encs.
