one restrictor for every style of window and door

The Jackloc window and door restrictor was designed with Health and Safety in mind. This was due to the number of restrictors failing and accidents occurring, sometimes resulting in fatalities.

Exceeding the demands of the British Standard BS6375 Part II Test 6 to a level of over 1,400 Newtons, the Jackloc restrictor can be fitted to any style of window and any window material including slim line steel W20.

Our client base includes organisations such as Travelodge Hotel Group, Leicester City Council, Thistle Hotels and the London Ritz Hotel.

- For security & safety
- Suitable for every type of opening window or door
- Can be fitted to all materials
- Key lockable - for individual locks or multiples
- Wide range of finishes - colour to suit
- Security screws provided
