Dear Barrington

33 QUEEN SQUARE REDEVELOPMENT APPLICATION REF: 2005/0066/P

I refer to your letter dated 19 July 2007 in which you advise that our application for discharge of condition 2 is incomplete and ask for additional information to be provided. Your 2 areas of concern and our responses are detailed below:

1.0 Sample Materials

A number of the materials are heavy and difficult to transport. The contractor has therefore gathered them together on site where they are available for inspection. I believe you have already had an opportunity to view some of the materials but wish Victoria Fowles to consider their appropriateness for use as she is the officer responsible for the discharge of the planning conditions. I am therefore, by a copy of this letter, inviting Victoria to site, to carry out her own inspection.

2.0 Departure in Elevational Treatment

2.1 You have asked for further information concerning the minor discrepancies between our own drawings and those submitted by Allies and Morrison as part of the original planning application. Our initial drawings were produced following discussions with Allies and Morrison. Since receiving your letter we have held meetings which have enabled us to develop the elevation as an accurate representation of the design intent. A letter from Paul Appleton of Allies and Morrison confirming their involvement is attached together with prints of our drawing number 1939/L/200 rev C.

2.2 Since we originally wrote to you we have spent considerable time discussing the form and the fabrication of the fins with both the subcontractor and Allies and Morrison. A solution has been developed which we believe embodies the intent of the planning proposals. Details of the subcontractors drawings are attached.
