

6th November 2007

For the attention of Joe Purcell

Application Ref: 2007/4973

To comply with recent changes in legislation we submit this access statement for application referenced as above.

ACCESS STATEMENT

Building Access:

The existing building entry and exit access will be unaffected by the proposed works. Existing entry and exit routes are not limited or obstructed in any way by these works. No alterations to the access is envisaged or detailed by these works.

Access to the roof working area is similarly unaffected by the works and will also remain unaffected.

DESCRIPTION OF THE WORKS

The design covers the removal of five in number air cooled chillers and the replacement with three in number new air cooled chillers of equal total capacity of the existing plant.

The new proposed plant will be quieter than the existing plant which can be verified with London Borough of Camden Environmental Health Officer Mr John Anani.
