

OAK GROVE - ACCESS / REFUSE

A basement car park gives direct access to all units and is provided with suitably concealed natural ventilation. Level access is provided to ground floor units which could convert to wheelchair units and all units are designed to convert to Lifetime Homes.

Refuse storage facilities are located adjacent to the front doors of the buildings for ease of collection from the street with ventilation and cleaning facilities provided.

Up to 10% of the buildings energy requirements will be generated on site by the provision of solar collection panels within the curtilage of the main flat roof.
