By Recorded Delivery

Dear Sir,

## **CAMDEN TOWN HALL LISTED BUILDING CONSENT**

Further to our telephone conversation on 27 January 2007, please find enclosed:

- A revised layout (Drawing 101750-04) showing location photographs were taken;
- A drawing showing a section through the shower area (Drawing 101750-05);
- A selection of elevations of the proposed rooms (Drawing 101750-05)

The shower cubicles will be constructed from aqua panel (a cement based board), which will be fitted in the shower areas with tiles from the Pilkington Matrix range. The tile colour will be Silk Aqua which is the same colour tile as previously used in the toilet refurbishments on the 1<sup>st</sup> floor of the Old Town Hall. The disabled toilet will also be finished with the same tile colour, with Peppermint Green tiles used where grab rails will be fixed.

The flooring throughout the project will be Polyflor Polysafe hydro-colour tempered steel. This is similar to the floor covering used in the previous first floor toilet refurbishment scheme except this covering has a greater slip-resistance when wet.

The un-tiled aqua panel surfaces will be covered with aqua panel Q4 finish that will be painted white. The prayer room will be finished with moisture resistant plasterboard painted Barley White. The floor in the prayer room will be covered with sheet carpet of a light brown/beige colour.

Please do not hesitate to contact me should you have any further queries. If you prefer we can meet on-site to discuss these proposals, which may be more beneficial.

Yours sincerely

Ian Smith
