Dear Mr Kirby,

**KING'S CROSS STATION - ENVIRONMENTAL STATEMENT FOR NEW  
WESTERN CONCOURSE**

Environmental Resources Management (ERM) is undertaking an Environmental Impact Assessment (EIA) for the above proposed development at King's Cross Station. The client has asked its environmental consultants, ERM, to prepare an Environmental Scoping Report outlining the overall approach to the EIA, the environmental topics to be included in the EIA and the assessment methodologies to be used.

We recognise that consultation is a key part of the EIA process and a copy of the Environmental Scoping Report is therefore enclosed for your information and comment. The document is provided as a means of informing you about the EIA, but should not be taken as a definitive statement of the scheme.

In order to allow your comments to be taken into account early in the EIA process, it is important that they be put in writing to arrive no later than three weeks from the date of this letter – either by letter or e-mail. I would be grateful if you would direct any comments you have with regard to the Environmental Scoping Report to myself at the above address.

Yours sincerely

Alistair Billington  
*Senior Consultant*
