Dear Mr Fleming,

Re: Wildwood Lodge – Proposed New House

Thank you for your revised site plans for the above proposal. Having compared these to my comments in the report of 8 June 2006, and our latest discussion I would advise that the requirements imposed by British Standard 5837:2005 will be met by the proposal in relation to protection of the prime trees on site.

The physical protection of the trees; design and construction of barriers will remain the same as per my report and the British Standard (part 7) when construction commences.

I understand that you intend to annotate the submission to the planning authority to show an access temporary track way across the retained garden of Wildwood Lodge entering the site between the canopies of the retained trees thus avoiding ground compaction and risk of damage to the trees crown bases. Further that, the already existing hardened driveway to Parfitt Close, that passes behind T2 will be used as the means of access to the new building possibly via a bridged drive or an above ground non compacting drive employing a pocketed geotextile sub base in-filled with fully porous, PH neutral granular surfacing.
