04.05.06

Dear Gareth,

**Ref: 2006/1839/invalid**

Further to your telephone conversation with John Burholt on 3<sup>rd</sup> May, regarding the missing information to our Listed Building Application for Jack Straw's Castle, I enclose the requested information.

- The walls to the ground floor and much of the basement will be lined in stud-work with 12mm plywood and finished in 12mm plasterboard, paint finished accordingly.
- Please find enclosed Sections A-E as requested. (JS-108 and JS-109).
- The children's slide from ground floor to basement is a bespoke element that the client is sourcing separately. Therefore we cannot offer any details of this as yet, this information will be forwarded to you once received.

I hope this is sufficient information, please let me know if you require anything further.

Once this application has been validated it would be useful to meet on site to discuss the project with you, I look forward to hearing from you.

Kind regards

  
John Burholt
