Zedi,

Apologies for the delay in following up my earlier email (below). I have now spoken to Jim Fergusson regarding the UCL development and he does not recall seeing a planning application from the local authority relating to this.

Our suggestion would be for the developer to respond directly to the local authority, indicating that Crossrail has been consulted and has recommended that any condition relating to ground movement be lifted.

Regards,

Mike Black

Zedi,

Thank you very much for the copy of the report entitled "Effects of Construction of Crossrail Tunnels" dated March 2005, relating to the above development. I have reviewed the report and agree that it is in close agreement with the earlier settlement assessment carried out by GCG and confirm that we have no further comment to make.

I am unsure of the current position with respect to any planning application conditions, but will check this with our safeguarding manager Jim Fergusson, when he returns to the office next week. My recommendation will be that any

settlement related condition is lifted.

Regards,

Mike Black
