

Planning Consent 2004/1021/P

Design Development

We refer to the above approval together with the subsequent approval of our application 2004/5503/P.

This brochure is a supporting document to our application for amendments to the planning consent. The amendments are design development items as follows:

- Alignment of the glazed walls to the office reception walls back with the building facade above. Introduce a canopy.
- Development of residential plans with its resulting modification of elevations.
- Development of sub-station wall on Whitfield Street to provide an interesting design appropriate to being adjacent to the main office entrance.

This A3 brochure compares the original consent drawings with our current application.
