

Re: 32 HILFIELD ROAD

Notes to accompany Dwgs No;

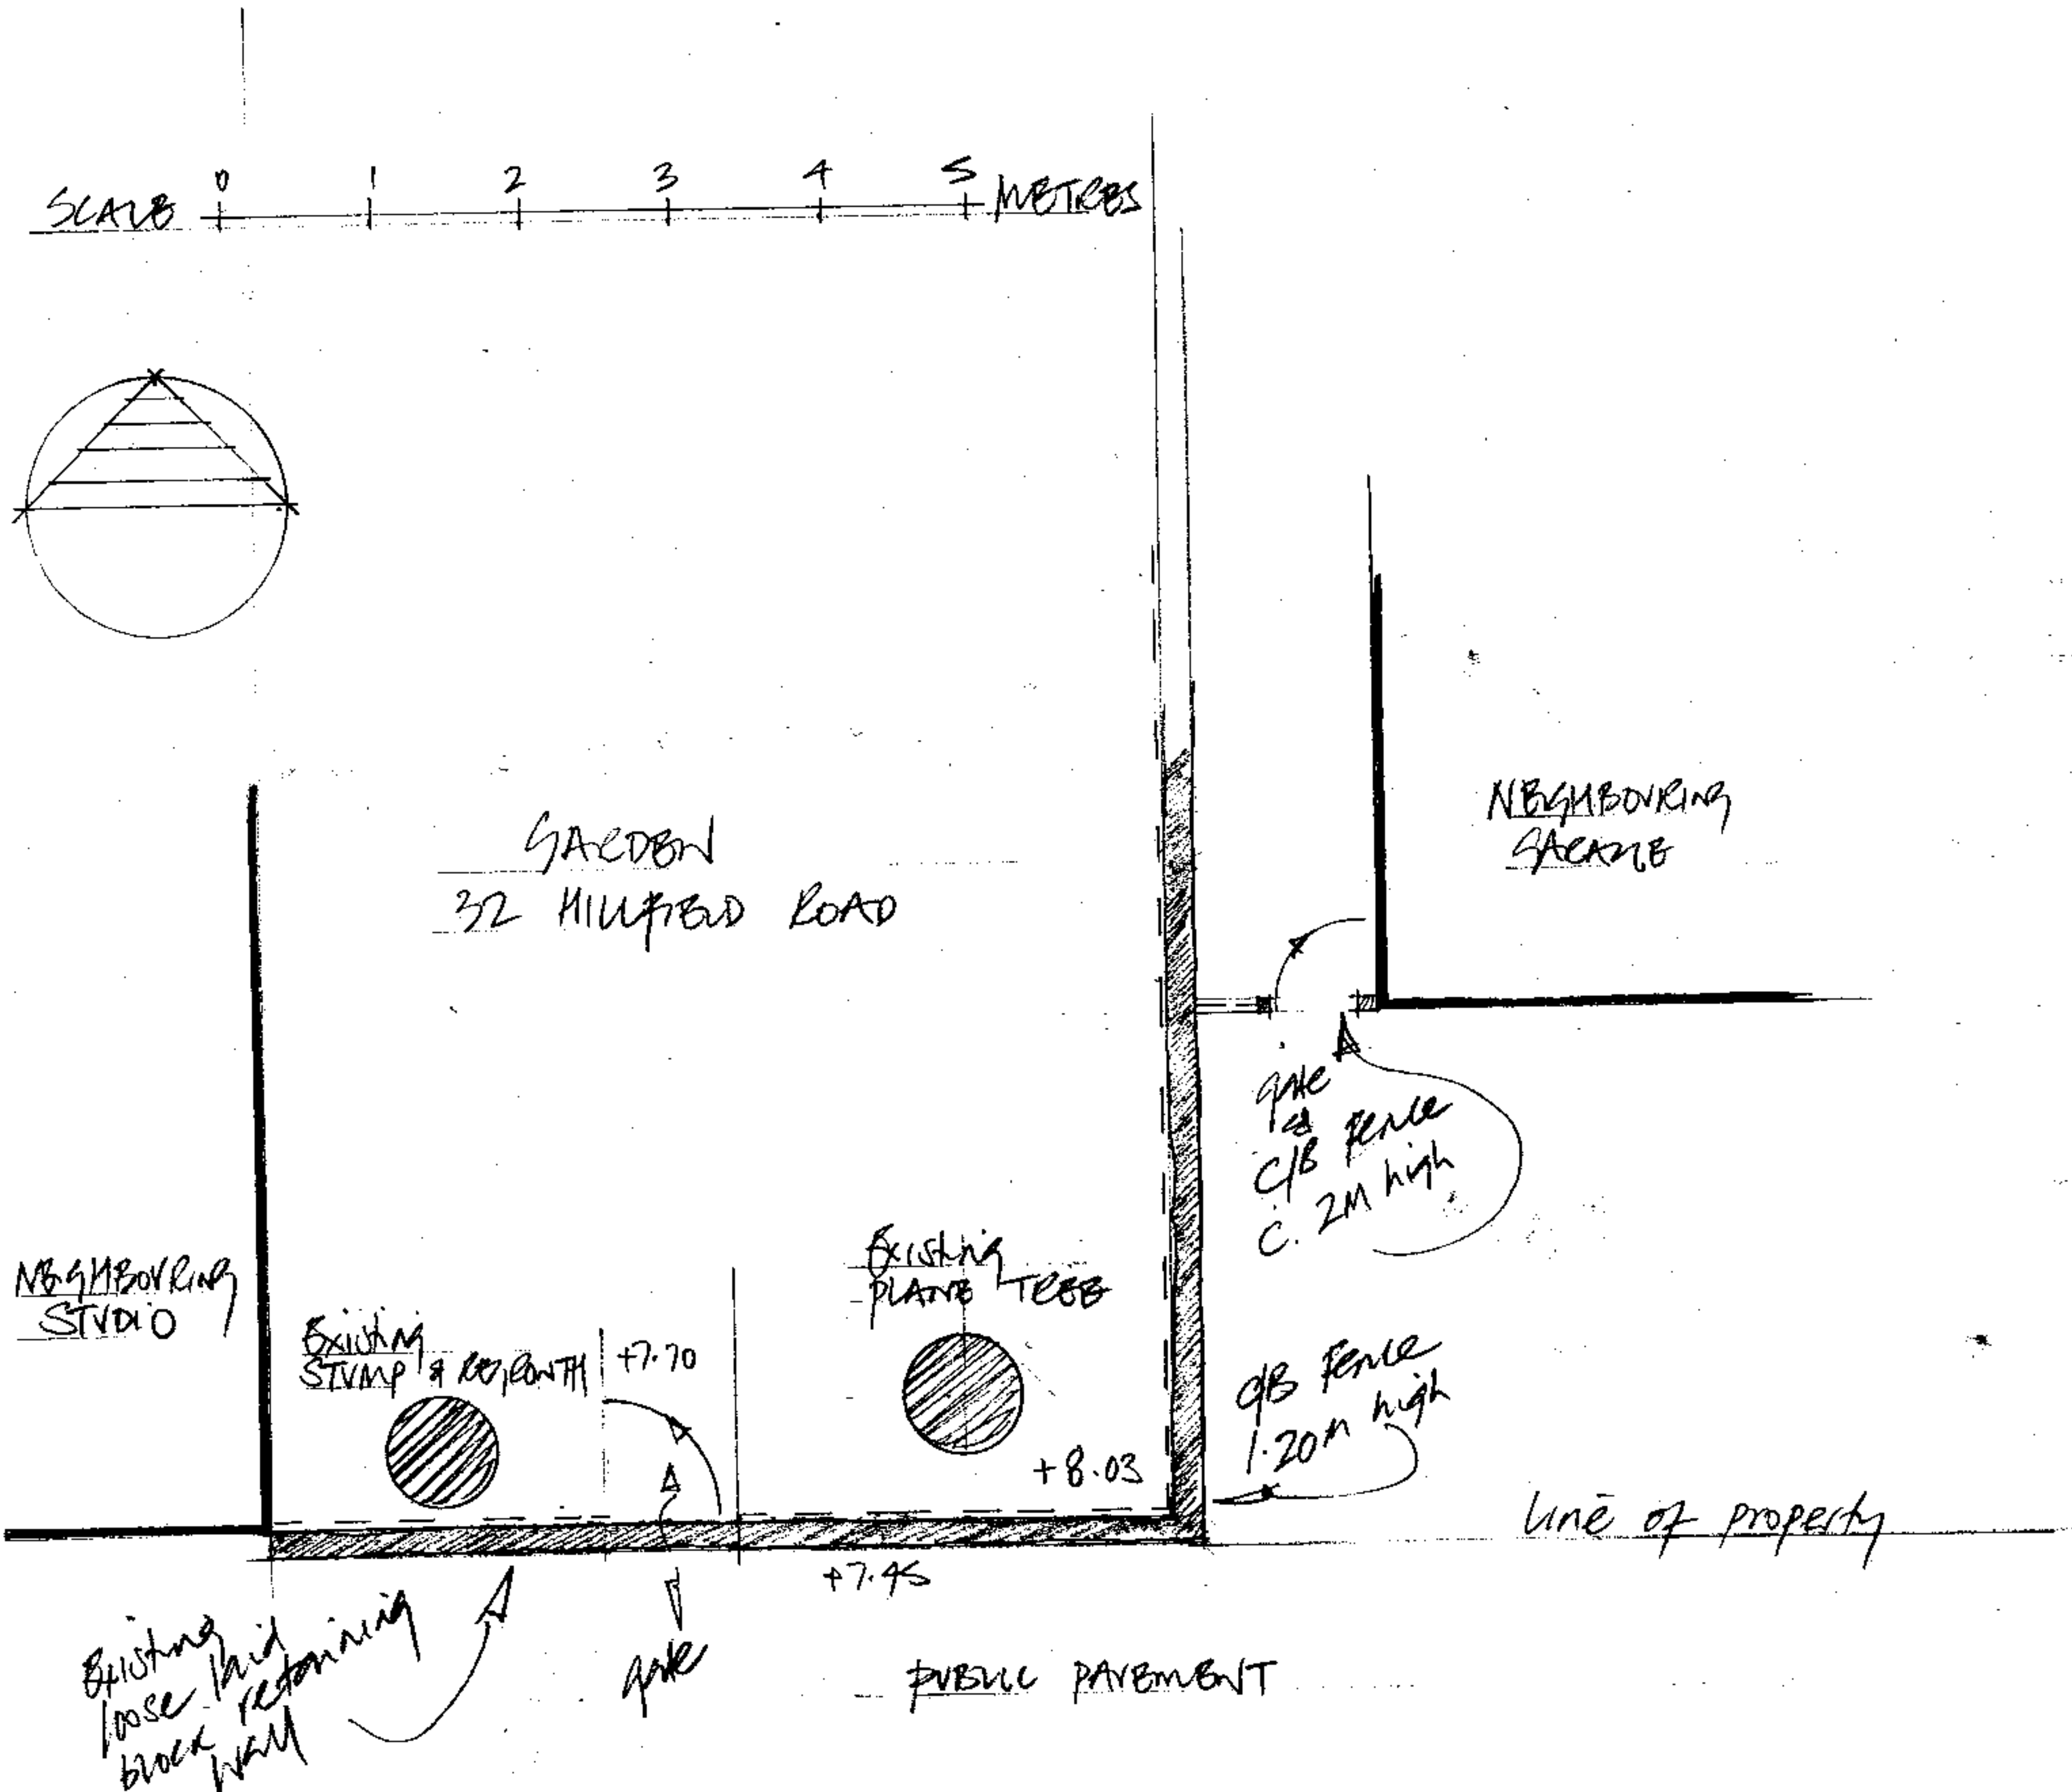

- SS050206/4
- SS 050206/5
- SS050206/6
- SS050206/7

1. This is a 'tree-friendly' scheme to improve conditions within the root zone of the existing tree and to keep the impact of work associated with the replacement fence works to a minimum.
2. The area of soft landscape under the tree has been extended
3. It is proposed to relocate the existing gate further away from the base of the tree
4. The steps and path leading to the gate will be constructed from large stone flags laid on the consolidated soil (i.e. no foundation works)
5. The proposed replacement fence is a post and panel construction; posts fixed in excavated pits approx 750 x 750 x 600mm deep starting at a depth of approx 600mm below existing ground level on the garden side (i.e. the principal root zone)
