

# **Tree schedule**

## **Introduction**

This schedule briefly outlines the health of the trees at 35 Greville Road in relation to the proposed first floor side extension. This is done in accordance with BS 5837: 1991

### **T1-False acacia:**

This tree is located within less than 2 metres of the proposed excavation and building works.

If the tree were to remain on the site than it would need a minimum distance of 6 metres around the rooting area in order to survive. Protective fencing on a scaffold framework would need to be in place. The tree seems to be in decline and has had stems severely cut back in the past, giving it an uneven shape. Due to the amount of work that it is likely to be carried out around this tree it would be debatable as to whether this tree would survive.

### **T2-T25**

All other trees on this site will be clear of any building operations and therefore will not require any tree protection.

## Key codes for Tree survey

**Tree no.:** This relates to position of the numbered tree on the map.

**Tree species:** Common name given.

**Tree level:** The height above ground level at which the tree has grown.

**Age Class:** Mature-M, Semi-Mature-SM, Sapling-S.

**Crown Spread:** the diameter of the trees canopy.

**D.B.H:** the Diameter at breast height (1.5m).

**Condition:** G-Good, F-fair, P-poor, and D-dead/dying.

**Comments:** Additional information relating to the tree.
