For the attention of ~~Mr~~ Claire Brady

Dear Sir

re: 12 - 18 Theobalds Road, London, WC1

With reference to the meeting held on site on the 19<sup>th</sup> December, 2001 with Ms Brady and Mr Ellenbrook, we would confirm the following matters discussed:-

- i) Air conditioning. It was agreed that the positioning of the air conditioning condenser units on the lower flat roof to No. 12 was satisfactory, subject to screening being introduced. This screening is now illustrated on drawing No. 23-00-19C and we attach five copies for your use.

We also understand that the air conditioning ceiling cassette units to the first and second floors of No. 12 are also acceptable.

- ii) Suspended Ceilings. The proposed coffered ceilings to first and second floors to No. 12 are acceptable.

With regard to the routing of cabling through the corridor areas, we attach five copies of drawing No. 23-00-50 showing a section at the differing levels.

- iii) Staircase. It is agreed that the staircase to No. 14 cannot be altered in any way. Therefore the alternative proposal is to install a spiral staircase between basement and ground floor levels to No. 12. We understand that this will be acceptable as it is located in the area of the former staircase. This work is indicated on drawing No's. 23-00-13E and 14E and five copies of this drawing are attached for your use.
