11th December 1973

Council's Own DevelopmentTown & Country Planning General Regulations 19748-42 Bassett Street, LONDON, NW5

I refer to the deemed approval given in our letter dated 20th September, 1973 for the redevelopment of the above site by the erection of a three storey block of 14, five-room maisonettes and 7, two-room flats, with an associated children's play area. The architects for the scheme, Messrs. Castle, Park, Dean and Hook were requested to consider the use of Stourbridge Buff bricks as facing materials.

The Architects submitted a panel of the recommended bricks with their letter dated 6th November, 1973 for the approval of the Development Control Committee.

I have to inform you that the use of the Stourbridge Buff bricks as facing materials is hereby approved.

Messrs. Castle, Park, Dean and Hook have been advised of this decision.

PS

Director of Planning & Communications.
