Site Description							
The site is part of a terrace of 5 houses facing Queensmead which is accessed of St John Wood Park. The house comprises of 3 floors. The area is entirely residential and the site lies outside of a CA and is not listed.							
Several properties in on the terrace and in the immediate area have carried out similar works to the houses (mostly under CLD).							
Relevant History							
2013/3549/P pp for loft conversion with rear rooflights, installation of two air conditioning units at rear							

ground floor level, and replacement of window and door at rear ground floor level with full width sliding doors to dwelling house (Class C3). [Retrospective] – *identical application currently under consideration*

Assessment

The proposed works include 4x rooflight to the rear roofslope, full-width sliding doors to rear g/f and installation of 2x AC units to the rear yard by the garage.

The main considerations with this proposal are design and amenity which are discussed below.

Design-

The proposed roof alterations can only be seen from the rear car parking access way and not from the main road or other public views and is acceptable in this location.

The g/f alterations cannot be seen from the public realm, as above and do not dominate to appearance of this rear elevation.

The AC units are located close to the rear elevation and do not impact views from the outside of the site. They are set below the boundary wall with the adjoining site and screened.

Accordingly, the proposed works comply with policy DP24 and CPG1 and are not harmful to their surroundings and host building.

Amenity–

The units were assessed by the Environmental Health Officer and considered to comply with Camden's noise standards. It is recommended to add a standard condition to control the noise level to accord with Camden's standards.

There are no other amenity issues arising from this proposal.

Accordingly, the proposal complies with DP26 and DP28.

Recommendation: Grant planning permission.
