Merging two windows into one long window on the side elevation of the residential building

Project: 24 Belsize Park, London, NW3 4DU

Dear Sirs:

We are applying for planning permission to merge two existing windows of the side elevation of the existing residential building into one long window.

The windows are currently visibly impaired from street view and will still adopt the appearance of the building when merged together.

The above proposal will not impact the premise nor will it have any alterations to any other parts of the building or usage of the site. The application is solely for the merging of two windows into one and for council's consideration and approval prior to carrying any works. We hope the material provided is satisfactory and should you have any enquiries please do not hesitate to contact us.

Yours truly,

Roselind Wilson Design
