## - Adapt the space (the existing height of the basement is of around 2.10 metres) by lowering the floor level in order to get a 2.50 metres height ceiling (move the floor down by 0.95m)

- A step in the rear part of the slab will be leveled by the construction of a new one. Replace a large part of storage space with five consulting rooms.
- Add a public toilet and a private toilet at the rear of the unit.
- Add a staff eating area.

Basement:

The existing use of the property is considered Class A1 - Shop and its storage space in the basement. With the proposal, the ground floor continues being a retail area, but the basement changes the use to storage plus consulting rooms, which can be classified as Class D1 - Non residential Institutions.
