2014/3517/P	Peter Julien	1c Highgate Road	12/06/2014 16:36:20	AMEND	In principle this is an improvement to the previous application for this site. However I cannot approve the proposed 1970's shop front at ground level elevation. The advertising board is crude and should match the adjacent building at No 8. The middle door should match the left hand half glazed door of No 8 whilst the new flat door should match the adjacent solid 6 panelled door.
2014/3517/P	SC & W Paul	72 Twisden Rd	17/06/2014 13:51:08	OBJ	OBJECTION: we object to this application to increase the height of the back addition section of the building by two floors. We object to the loss of light and air to the rear of our building, number 1 Fortress Road, which backs directly onto 6 Highgate road. And in addition, the loss of privacy from overlooking windows at the back of the property. We do not accept the recommendations concerning the loss of light. We feel that a taller building would be very overpowering and the loss of light, unacceptable.
2014/3517/P	Robert Binney	5b Highgate Road NW5 1JY	18/06/2014 15:51:20	NBJNOT	I am not objecting to this planning application. In fact I believe it to be a positive addition to the street scene. It will create consistency in the front elevations in that section of the street more level with buildings on either side. I still do not understand why an area of Georgian houses and such period structures as The Forum and The Bull & Gate are not within the confines of a formal Conservation Area. I am sure this planning application would still be approved if it were. I am now commenting for that reason, and also to understand the proposed timescale of the works involved. is there a time limit of completing the development? Also the impact upon the narrow pavement in front of the building - pavement closure and therefore bus stop closure perhaps? The dental practice on the ground floor with shop front appears to have been recently unboarded - is the practice in operation? Will it continue during the planned works? Were the recent roadworks relevant to this application? Will refuse collection take place at the front or the rear of the property?WHAT MATERIALS WILL BE USED TO RENOVATE THE FRONT ELEVATION? nO 8 HAS BEEN COMPLETELY REBRICKED BY THE LOOK OF IT.mANY THANKS.
