

The application

The proposal is to add 3 black iron posts with black iron link chain connecting. The link chain will be removable so as to allow for vehicle access to 2 private car garages.

Objectives

The reasoning for adding a chain link and posts is to determine clearly the property boundary and prevent any more parking tickets being administered on what is private property within the bounds of Squires Mount, London NW3 1EG

Design

The 3 iron posts will be black and in keeping with those similar in the area in terms of size and design. The link fence will be black iron as well. It will be of suitable length and will be removable in order to let vehicles enter in/out the 2 garages within Squires Mount.

The 'mock-up' photo below shows the position of the proposed 3 posts. With the chain connecting these posts, it will form a boundary for the private driveway.

Proposed position of the 3 new iron posts

The proposed design and style of the posts, and the location of them within the property, is in accordance with suggestions and feedback made from Camden Council prior to submission of formal application.
