LEG BASEPLATE DETAIL PLAN VIEW

FOUNDATIONS

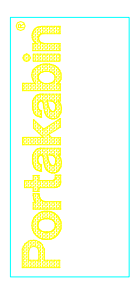

Simple foundations or level hardstandings are required to be capable of taking the foundation design load at each Lodastrut leg position of 26 kN, which includes the dead weight of the unit, imposed floor load of 3kN/m² imposed roof load of 0.75 kN/m² and a basic wind load of 50 m/s. The foundations are to be designed in accordance with BS 8004 with level tops of a tolerance of ± 3mm.
 The top level of the foundations must ensure a clearance between the ground and the underside of the building.

KEY
