

1. New fascia panel to replace existing, to reinstate original shop front design with pilasters and cornice. Fascia panel to be satin/matt finish, to match RAL9004
2. Linear LED light fitting, 1050X50X50, in silver/grey satin finish RAL 7001, mounted to top of fascia panel above logo lettering.
3. Birkenstock logo text to be flat cut from 3mm thick aluminium sheet finished white to match (RAL9003) with double sided tape to the rear and mounted above entrance.
4. Projecting Sign fabricated with back to back shallow aluminium panels having 25mm deep perimeter. Returns powder coated white to match RAL 9003. Face of each panel applied with digitally printed vinyl logo graphics. Mild steel bracket support / fixing bracket finished black and fixed through the main fascia sign to timber background.
5. Retractable drop-arm canopy to run across the width of the ground floor shop unit only within cassette box, in satin finish RAL 9004, fixed below fascia panel and support arms fixed to window mullions either side of shop unit. Canopy to extend from building line by 700mm with underside of leading edge 2500 from pavement level.
6. Existing window mullions to be painted satin finish RAL 9004
