2014/2076/P	D Abrahams	7 Crossfield Road	22/04/2014 23:10:54	OBJ	<p>The existing structure has steel supports with concrete foundations. It is very large measuring some 6 metres long, 2.5 metres high and over 2 metres wide. It is larger than a carport with a high, flat roof that traps fallen leaves, which is unsightly. This together with the paving and brick barbecue means that the view from our windows is dominated by this eyesore which is not in keeping with the Belsize Conservation area.</p> <p>The structure has been built without any consultation with neighbours.</p>
