2014/2118/P	Paul Christie	8 Gordon Road Widcombe Bath BA2 4NH	14/04/2014 15:12:38	OBJ	<p>This is an OBJECTION to plan 2014/2119/P</p> <p>My parents live in the maisonette below the proposed development. They have lived there since 1954 and are both in their nineties.</p> <p>It is difficult to imagine how traumatic the disruption involved in this sort of development can be to people of this age. My wife and I were shocked at the distress and illness which resulted after a flood from the flat above a few years ago. It took several months to dry out the house and redecorate but, to us this seems a minor problem compared to the possible disruption which will accompany the proposed work. I don't want to be too negative, there will be many benefits from the work, but I am very concerned to keep the stress involved for my parents to a minimum. For that reason I would be much happier if the proposed dormer was replaced with velux windows.</p> <p>I realise that a dormer window would release more space in the loft but in this case it seems unnecessary and skylights can be installed without the need for scaffolding, which would make a big difference to my parents.</p>
