INTERNAL SPACE _ FAMILY SPACE DESIGN

Family Space design_

During our most recent discussion you expressed the need for a family space located on the ground floor adjacent to the kitchen, with outlooks onto the garden.

We have created an extension to the rear of the property, projecting into the garden, which will accommodate a soft seating area and a space for informal eating, homework, socialising and the opportunity for surveillance of the garden.

- This extension projects no more than 1.5m beyond the existing line of the house and is single storey. This has given us the opportunity for a slim skylight allowing light into the space from above, and a small area of green roof around.

- The proposed seating will be similar to the adjacent image although we envisage soft 'comfy', low level seating with storage underneath.

- The large strip of window wrapping around the corner creates an immediate visual reference through to the garden when you enter the rear space from the entrance hall.

- There will be a feeling of sitting in the garden when using this space. Externally a planted border breaks up the transition of levels.
