7. Identification Of Tree(s) And Description Of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

Rear Garden
Cork Screw Willow - Approximately 9m. This tree has shown strong regeneration since the remedial pruning carried out some years ago. Reduce crown by approximately 30%, thin crown density by approximately 20%. Reason - to manage the tree at a reasonable size for its location.
2 x Sugar Maple - Approximately 9m. Located on boundary with 68 Froggnal, NW3 6XD. Reduce crown by approximately 30% back to previous reduction points ensuring a suitable amount of secondary furnishing growth is retained for crown continuity.

8. Trees - Additional Information

For all trees

A sketch plan clearly showing the position of trees listed in Question 7 must be provided when applying for works to trees covered by a TPO. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes). It would also be helpful if you provided details of any advice given on site by an LPA officer.
