

*5 Perrin's Court, London NW3 1QS*

Rachel Miller  
Planning Officer  
Camden Borough Council  
Town Hall  
Judd Street  
London WC1 8ND

01 July 2014

Dear Rachel

**Re: Planning Application 2014/3211/P 7-9 Perrin's Court**

Please find enclosed hard copy of the petition I have e.mailed to you. This has 198 objections to the development proposal - considerably more than last time, despite it being gathered over a period of one week only. It consists of a variety of signatories, some being local residents, and most being patrons of the various cafes and shops in Perrin's Court, particularly Mani's, who actively promoted the petition throughout the week.

These small businesses would lose revenue if Perrin's Court were to become a less desirable place to visit, all for the sake of one small flat. Is it really worth it?

Yours sincerely

Tim Goss JP

**FURTHER PLANNING APPLICATION REF 2014/3211/P  
PROPOSAL TO ADD AN EXTRA FLOOR ROOF EXTENSION TO 7-9  
PERRIN'S COURT, HAMPSTEAD**

Perrin's Court is of unique historical character. It is a narrow street with a good mix of shops and homes. To add extra residential units will cause overdevelopment of the site. Last year an application to build on the roof of Savills was rejected for multiple reasons, including it being inharmonious, having a harmful impact on Perrin's Court, there being an inadequate study of daylight/sunlight on the adjoining lanes and properties, loss of privacy and light to adjoining properties, and development/construction work being detrimental to the amenities in the area. The revised plans do little to take account of these objections. All of the above still apply to some degree. There will still be a loss of privacy and light (particularly to the higher floors of the adjoining houses and flats) and the ambience and character of Perrin's Court will change for the worse. See Policies CS14, DP20DP24, DP25, DP26, CS5, CS19.

**PLEASE SIGN THE PETITION**

We, the undersigned, call on Camden Council and the Development Control Committee to reject the application.
