Re: Comments on 2014/2464/P have been received by the council.

Hi, having just read my email confirmation of my complaint, I would like to add that I am happy to be contacted by email or by telephone if necessary. (I did not see the choice for being contacted).

thanks
James

Having heard about the proposal, I would like to register my opposition. As much as I accept a person's choice to believe whatever religion they like, I do not wish to live in an area that has been given special treatment of any kind for any faith. Whether or not the wires are ugly, the wires will exist and they will be seen, and it is what they stand for that concerns me. The laws concerned with the eruv are arcane and outdated by 2014's standards and we should be protecting our progress as a society, not restricting it. As an example, how do parents of a disabled child reconcile the need for an eruv? What kind of message is erecting the eruv sending to people who depend on medical equipment, to the elderly, or to anyone who's modern lives depend on doing things that are forbidden by laws created hundreds if not thousands of years ago. This is wrong and I believe that by rejecting planning permission for this project, Camden Council are demonstrating a commitment to equality, fairness and respect to all.

I'd like to add that this will significantly ruin the beautiful view from Mill Lane up the railway of the lovely sunsets we often see. A five metre pole in the middle will destroy this.

I wholeheartedly object to this plan. The Mill Lane poles will be erected immediately outside of my house, and I do not wish to see this eyesore every time I leave my property.

I also believe they pose a potential danger to passing lorries and buses, as any sag in the wire could snag on a passing tall vehicle.

It is an entirely anachronistic proposal, and relates purely to very very few people (a small minority of a small minority of a particular religion).

I do not believe that any person or organisation should have the right to place materials pertaining to their organisation on land they do not own.

Your comments on the planning application

The proposed use of low or no visibility transparent and thin nylon fishing line as a demarcation of the proposed "Eruv" zones presents a very real and serious threat to local wild bird life, who will suffer, as we know from experience, fatal injuries from flying into a hazard that they cannot see. We would suggest that setting up such an obvious and well-known hazard to wild bird life in the full knowledge that wild birds will be killed as a consequence, goes against the spirit and possibly also the letter of the Wildlife and Countryside Act 1981 and the associated EC Birds Directive. We would ask that the construction materials be reconsidered in the
